

## Post-Doctoral Position

Ref: MBP01368

Department of Biology (Genetics)

Salary Grade 7 (£32,277 to £37,394 per annum)

Fixed Term Funding for up to 3 years

The project forms part of an [ERA-CAPS](#) transnational network studying the Evolution of Sexual Reproduction in Plants (EVOREPRO). You will join the research group of Prof. David Twell, and work with an international consortium of eight partners across Europe and the USA.

You will investigate the evolution of gene regulatory networks and their importance in the sexual development of early land plants and their economically important crop relatives.

The successful candidate will have experience in plant molecular genetics. Experience in bryophyte biology, cell imaging and bioinformatics would all be of value.

To apply, search for ref MBP01368 at [Job Vacancies](#)

For informal enquiries, contact Prof. David Twell [twe@le.ac.uk](mailto:twe@le.ac.uk)

Closing Date: 23rd July 2015
